SUMMARY

B.Tech CSE (Hons.) student specializing in AI & Analytics with hands-on experience in full-stack development, AI automation, and multi-agent systems. Hackathon runner-up and Top 9 solo finalist with experience building and deploying real-world AI and web applications. Skilled in JavaScript, TypeScript, Python, React, Next.js, Node.js, Express.js, and PostgreSQL, with a strong interest in software development and AI engineering.

PROJECTS

FounderOS AI | Multi-Agent Business Orchestrator

- Built a multi-agent AI system enabling specialized AI agents to collaborate, delegate tasks, and execute complex business workflows.
- Designed agent-to-agent communication, workflow orchestration, and task delegation pipelines for automated business processes.

HostelFlow(Hostel Management System)

- Developed a full-stack hostel management system with issue reporting, real-time tracking, and role-based access for students and admins.
- Implemented features like live chat, notifications, and comment system to improve communication and issue resolution.
- Built an admin dashboard for managing users, assigning tasks, and monitoring issue status efficiently.

NirogAI(AIHealthcareAssistant)

- Developed an AI-powered healthcare assistant for symptom analysis, triage classification, and preliminary diagnosis support.
- Implemented features like AI-generated clinical reports (SOAP notes), follow-up questioning, and medical chatbot for user interaction.
- Built structured doctor portal for patient management, report history, and decision support.

ACHIEVEMENTS

- 🏆 Runner-Up —Phantasia Hackathon
- Secured 2nd position among multiple competing teams by building an innovative tech solution under time constraints.
- 🏆 Top 20 — Solo Hackathon (Google Developers Group)
- Ranked among top 20 participants in an individual hackathon organized by GDG, demonstrating strong problem-solving and development skills.
- 🏆 Top 9 — Build With TRAE Hackathon, New Delhi | Solo
- Selected among the Top 9 projects while competing against around 90 developers and AI builders; independently built FounderOS AI, a multi-agent business orchestration system.

EDUCATION

BACHELOR OF TECHNOLOGY COMPUTER SCIENCE (HONS)

Aug 2025-present

- GLA University, Mathura
- Specialization in AI and Analytics.

CLASS XII

2023-2024

- Hardayal Public School
- Percentage: 82.8%

CLASS X

2021-2022

- Hardayal Public School
- Percentage: 97.8%

SKILLS

- Languages: JavaScript, TypeScript, Python, Java, C, SQL
- Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS
- Backend: Node.js, Express.js, REST APIs
- Databases: PostgreSQL, MongoDB
- AI & Automation: Generative AI, AI Agents, Multi-Agent Systems, AI Workflow Automation
- Developer Tools: Git, GitHub, VS Code, Vercel
- Core Concepts: Data Structures & Algorithms, DBMS, OOP, API Integration
